

Hello,

As part of the 100 Years of Radio Broadcasting in Canada activities, the Montreal Center for History (335 Place Youville in Montreal) is organizing a conference on the early years of radio in Canada.

This conference will take place on December 5th at 2:00 pm and will be given by Mr. Denis Couillard, Director of Government Strategies, at Ultra Electronics TCS. (See details below)

Waves and men

Canada's first radio broadcasts in Montreal in 1919

Lecture by Mr. Denis Couillard (in French)

RESERVATIONS: 514 872-3207 or chm@ville.montreal.qc.ca

Regular rate: \$ 5 to \$ 7.50.

Please note: If you wish to participate, you must reserve your seat in advance.

Denis Couillard

A graduate in Electrical Engineering and Technology Management from École Polytechnique de Montréal, Denis Couillard has been active in the telecommunications industry for over 30 years. Over the years, he was involved in the development and launch of several radiocommunication products and initiated several innovation projects. Denis is the author of a book on strategic technology management and holds two US patents in attack and electronic protection. Denis is currently Director, Government Strategies at Ultra Electronics TCS in Montreal. Formerly known as the Canadian Marconi Company, Ultra is the developer of the industry's first cognitive radios and the provider of high-speed tactical radios that support all major deployments of US and Canadian armies.
